INTRODUCTION

*Creating a resume is a bit tedious task for any working professional from any industry

one has to keep short, simple with the latest work experience

*The system is developed to provide an easy means for creating a professional looking resume

*The website typically includes templates and pre-designed layouts that users can customize with their own information, such as their education, work experience, and skills

* A good resume helps employers quickly see why you would be a good fit for the job

Objective

- The main objective of online resume builder is to manage the details of resume, job, individual, skills, qualification
- You will develop a webapplication that will auto generate a nice and properly formatted resume from the info filled.
- The system is flexible to be used and reduce the need of thinking and designing for individuals
- User have option to create resume in any format and file

PROJECT WORK

Conclusion

1) In conclusion, a resume builder is a valuable tool for job seekers looking to create a professional-looking resume quickly and easily.

2) However, there are potential drawbacks to using resume builders, such as limited customization, generic resumes, and lack of flexibility.

3) Additionally, ongoing updates and improvements to the templates and design options can help users create resumes that are tailored to their specific industry or job role.
